Expert nutritional support in a spray

A solution to the digestive discomfort and poor absorption experienced from ingested iron supplements. BetterYou Iron Oral Spray delivers 5mg of highly bioavailable iron in just 4 daily sprays.

The tiny droplets absorb quickly into the buccal membrane of the inner cheek for immediate absorption into the rich vein network below, passing the nutrient directly into the bloodstream for immediate utilisation.

Our work with Cardiff University has produced a nutritional delivery system that provides an effective alternative to tablets and capsules.

Support in
a spray

Iron contributes to the
normal function of the
immune system,
supports normal
cognitive function,
and helps with the
reduction of tiredness
and fatigue.

No digestive
discomfort

Reduction in
tiredness and
fatigue

Supports
immune health

Supports normal
cognitive function
